

COMPOSITION FOR PROTECTING SKIN FROM DAMAGING EFFECTS OF ULTRAVIOLET LIGHT

Abstract

A topical composition for the protection of skin from damage caused by ultraviolet
5 radiation. The composition includes a jojoba extract that absorbs ultraviolet radiation having one
or more wavelengths between about 290 nanometers and about 400 nanometers. The
composition further includes a jojoba extract comprising a plurality of antioxidant compounds
comprising a ferulic acid moiety. The topical compositions are incorporated into sunscreen
products, soap, moisturizing lotions, skin toners, and other skin care products.
